

Irene's Myomassology Institute
Student Massage Clinic Covid Safety Protocols

- Clients are asked to reschedule without penalty if they are experiencing fever, cold/flu symptoms or have been exposed to Covid.
- Students wear face masks covering their nose and mouth, wash their hands past the elbow before and after every massage.
- During massage, clients wear face masks while lying face up. While face down, masks can be removed as face rests are covered using a special technique to prevent droplets from being released into the room.
- Each treatment room is equipped with hepa air filtration units, hand sanitizer, disinfectant spray and no-touch trash cans.
- Students have a full 30 minutes between clients for hygiene and room sanitation protocols.
- Students and staff received specialized training on cleaning and disinfection procedures in massage settings.
- Our stringent sanitation protocols use **EPA-certified disinfectants** on all surfaces, doorknobs, chairs, massage tables, pens, clipboards, etc.
- All linens and blankets are changed between every client.
- Clean and used linens are stored in separate enclosed receptacles.
